## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 20-43 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

Regarding claims 20,26 the prior art fails to disclose or make obvious a method of monitoring the condition of a semiconductor wafer surface having the steps of rotating a first sensor about a platen axis at an angular velocity and rotating the wafer about a wafer axis at a wafer angular velocity that is not equal to the sensor angular velocity, and in combination with the other recited limitations of claims 20,26. Claims 21-25,27-40 are allowed by the virtue of dependency on the allowed claims 20,26.

Regarding claim 41, the prior art fails to disclose or make obvious a method of chemical mechanical polishing having the steps of urging a polishing pad against the semiconductor wafer carried on a wafer carrier, with the wafer carrier having multiple chambers that allows for independently varying pressure within the chambers that urge against a wafer at corresponding localized zones on the wafer and independently adjusting the pressure within one or more of the chambers responsive to the surface conditions within each of the corresponding localized zones , and in combination with the other recited limitations of claim 41. Claims 42-46 are allowed by the virtue of dependency on the allowed claim 41.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
